

A B2B digital & dynamic knowledge platform for welding industries

WeldGalaxy Project

Bringing together global buyers and EU sellers

Newsletter No. 1

What is WeldGalaxy?

WeldGalaxy is a **B2B online** platform that will bring together global buyers and EU sellers of welding equipment along with accessories/consumables and services — A digital platform aimed to enhance the visibility of EU’s welding products/prototypes/services to global users and providing innovative web-based services.

WeldGalaxy will incorporate a **Knowledge Based Engineering Tool** that streamlines equipment selecting process for end-users and allows ‘plug and produce’ digital manufacturing of the right equipment to specified customers/end-users’ requirements and regulatory compliance.

‘Our Goal is to create a highly visible and transparent B2B online platform that connects end-users with equipment and consumables manufacturers, suppliers, distributors and technology service providers’ – WeldGalaxy Consortium
